

A man with grey hair, wearing a blue lab coat over a collared shirt and grey cargo pants, stands in a laboratory. He is looking towards the camera with a slight smile. The lab is filled with various pieces of equipment, including a microscope, a computer monitor, and a large piece of machinery with a red 'SCS' label. The lighting is a mix of blue and purple, creating a professional and technical atmosphere.

Work on Programs Vital to National Security

Utah State University Space Dynamics Laboratory (SDL) has been solving the technical challenges faced by the military, science community, and industry since 1959.

As one of the nation's University Affiliated Research Centers (UARCs) and a strategic and trusted Government agent, SDL has designed, fabricated, and operated sensors on over 440 space missions. Additionally, SDL has deployed over 500 hardware and software ground systems for space and airborne tactical reconnaissance research and development.

SDL is headquartered in North Logan, Utah, with nine field office locations across the US: Albuquerque, NM; Bedford, MA; Colorado Springs, CO; Dayton, OH; Huntsville, AL; Houston, TX; Los Angeles, CA; Stafford, VA; and Washington, DC.

PEOPLE ARE OUR GREATEST ASSET

SDL's prosperity and longevity are due to the caliber of our employees. Our highly educated and hard-working employees love what they do and foster a close-knit, team-focused environment.

SDL celebrates professional achievements and provides an internal recognition program that promotes positivity and encourages employees to nominate colleagues for outstanding performance.

Our employees have a strong sense of community and family. The employee clubs and company-sponsored family and community outreach events foster an equitable work-life balance.

LIVING IN LOGAN

Utah's diverse terrain and climate are ideal for a variety of outdoor adventures. From its southern Mojave Desert, red rock cliffs, and sandstone to its northern Wasatch mountains, rivers, lakes, and forests, Utah's options for hiking, mountain biking, climbing, skiing, snowshoeing, camping, boating, swimming, hunting, and fishing are endless.

Logan is located in northern Utah's Cache Valley, which is nestled between the Wellsville mountain range and the northern Uinta-Wasatch-Cache National Forest. Salt Lake City is less than 90 minutes away, and its airport is a Delta travel hub second in size to Atlanta, GA.

Logan is home to Utah State University (USU), and our USU "Aggie" spirit is celebrated valley-wide. USU provides a diverse culture, collegiate sports, theater, and fine art events. In downtown Logan, the critically acclaimed Utah Festival Opera & Musical Theatre, Music Theatre West, and the Cache Valley Civic Ballet perform in the historic Ellen Eccles Theatre. Other events include annual fairs and rodeos across the valley.

As an agricultural community, Cache Valley holds a weekly farmer's market during summer months and celebrates farming and the harvest with annual city events such as River Heights Apple Days and Richmond Black and White Days. Foodies feel at home here with a variety of agricultural businesses and local restaurants to choose from.
